The new issue of the Balkan anarchist journal Antipolitika is out!

1600 ARMED WOMEN

Reading of the brochure "Mujeres más allá de las armas Vol.I" - in seven Testimonials FLINTA* tell their experiences in guerillas and jail, about their courage and fears, their life and their love for liberation and revolution. "Mujeres más allá de las armas" is a piece of feminist history - many of the revolutionaries tell their stories for the first time in this issue.

As part of the anarchafeminist translation collective that translated the texts from spanish to german, we present the brochure and read some excerpts.

1800 DIOGENES (BOGOTÁ)

Diogenes magazine represents a struggle against oblivion, a struggle of silence in the face of the insolence of authoritarianism and contempt, the courage to express and connect fights for memory in Europe and in our America, it is the affirmation of our freedom. In this fight, the press plays a very important role, which is why we want to report freely and critically. Our aim is to become an independent, alternative and anarchist media, because we are convinced that it is necessary to dismantle the media apparatus of capital. The inspiration for this project was born from the events that took place during the Colombian social uprising in 2019 and 2021, it was only this year that we materialised the magazine.

1330 PSYCHOEMOTIONAL SELF + COMMUNITY

DEFENSE: CONFRONTING INTERNALIZED

Under psychoemotional self defense we understand the individual and collective ability to be aware of, support each other against, withstand/be resilient against and actively resist the somatic, emotional, mental and behavioral manifestations of domination within us and our groups. We want to find collective ways of dealing with traumas, wounds, struggles in order to self defend ourselves, our friendships, crews and networks from patriarchal_capitalist intrusions.

Through fostering individual and collective anti-authoritarian resiliency, ability and awareness, we also want to increase our agency and support ground in attacking authority on the more external levels.
